

AT-TRAK - An available advanced line, is specially designed for trucks, vans and SUVs in all conditions. It provides enhanced tread design with superior steering, braking and handling on wet surfaces. It also offers superior traction, stability, control, dry, wet, rocky and snow, with 3.0 sipes designed to enhance traction performance while not compromising on tread life.

The construction of 3 sipes and longitudinal grooves, zig-zag sipes pattern, and open shoulders allow water to be displaced to a maximum of 60mm depth and thereby, also prevent aquaplaning. All Fullrun products are designed to meet or exceed the following performance targets:

• All-Season Tread, wet and dry
• High load capacity
• High fuel economy
• High load capacity

Key Specifications

AT-TRAK	UTD000583A
Size	Specs
Max Load	1000
Speed	160
